

**ASIA PACIFIC COLLEGE**  
**SCHOOL OF ENGINEERING**  
**COMPUTER ENGINEERING**  
**SY 2018-2019, TERM 2**

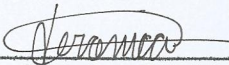

**MINUTES OF THE MEETING**

---

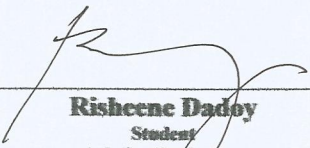

**Date** : November 28, 2018  
**Time** : 1:00 pm – 2:00 pm  
**Venue** : 1514, L and S Building, Roxas Boulevard, Manila, 1000 Metro Manila  
**Attendance** :

  
**Engr. Alvin Requimin**  
Geodetic Engineer  
DENR-MRB MIMAROPA

  
**Engr. Kenneth Solidum**  
Geodetic Engineer  
DENR-MRB MIMAROPA

  
**Veronica Gubatan**  
Student  
Asia Pacific College

  
**Hamill Marinda**  
Student  
Asia Pacific College

  
**Risheene Dadoy**  
Student  
Asia Pacific College

---

**LIDAR:**

- Lidar technology is expensive.
- Lidar sensor is difficult to use if it will be done for vegetated areas, the data gathered is not accurate.
- The advantage of using LiDAR in other surveying equipment is that it can cover large areas.
- LiDAR has first, second and Last return. That you can manipulate to produce a topographic map.
